

Description

We are looking for mid-senior System Analysts with a strong technical background. Do you have passion for using data in order to drive process improvements? Are you experienced with SQL, Excel and Quicksight?

This is an amazing opportunity if you are you keen to innovate by identifying improvement opportunities providing to the Marketplace business with robust automated insights.

In this role, you will help identify, track and manage Key Performance Indicators (KPIs), partner with the internal and external program teams to identify root-causes of spikes or plummets in key metrics while carrying on mid-term to long-term projects to improve our services, processes and tools.

About the team

Over 2 million Sellers in 10 countries list their products for sale on the Amazon Marketplace. Sellers are a critical part of Amazon's ecosystem to deliver on our vision of offering the Earth's largest selection and lowest prices. These Sellers offer hundreds of millions of unique products providing a broad and diverse inventory of products from Books, Electronics and Apparel to Consumables and beyond. In our vision to build a global marketplace, we will enable Sellers to list, make their selection available to customers globally while optimizing their inventory placement across multiple countries. EU 3P Compliance organization enables Sellers to sell on Amazon's EU Marketplaces in compliant manner, adhering to EU legislative requirements across Tax, Trade, EPR (Extended Producer Responsibility) and Product Compliance.
